Philippos Tsikouras *Full-Stack Developer | React | Java | Spring Boot*

philipos793@gmail.com | 6942424628 | Ioannina, Greece | github.com/Philippos793 | linkedin.com/in/philippos-tsikouras

PROFILE

Software Developer with hands-on experience building **full-stack web applications** using **Java**, **Spring Boot**, **React**, **SQL databases**, and **REST APIs.** Experienced in backend development, database integration, authentication, role-based access control, and responsive frontend development. Comfortable working with **Hibernate/JPA**, **Spring Security**, **Git**, **Maven**, and **Docker**, with a strong focus on developing reliable and maintainable web applications.

EDUCATION

BSc in Computer Engineering and Informatics 10/2017 – 09/2026
University of Ioannina, Greece

TECHNICAL SKILLS

Programming Languages:
JavaScript, Java, Python, C, PHP

Databases:
SQL, MySQL, PostgreSQL

Frameworks & Web Technologies:
React, HTML5, CSS3, Spring Boot

Tools & Technologies:
Git, GitHub, Maven, Hibernate/JPA, Spring Security, REST APIs, Docker, Linux

PROJECTS

ManageFlow – Employee Management & Task Collaboration Platform
• Developed a full-stack web application using **React** for the frontend and **Java/Spring Boot** for the backend.
• Implemented secure authentication with **Spring Security** and **JWT**, with separate ADMIN and EMPLOYEE roles.
• Built employee management with admin-approved registrations, time-limited invitation links and **email notifications**.
• Developed work-shift tracking, monthly work-hours reports and task management with deadlines, checklists, attachments and in-app notifications.
• Designed the **PostgreSQL** database with **Hibernate/JPA** and containerized the application with **Docker**.

SocialBookstore Web Application
• Developed a full-stack book-sharing platform using **Java 17**, **Spring Boot**, **Thymeleaf** and **Bootstrap 5**, following the MVC pattern.
• Implemented authentication and role-based access with **Spring Security**.
• Built a request workflow where owners choose who receives each book, with **email notifications** to every requester.
• Containerized the application and **MySQL** database with **Docker Compose** for one-command setup.

Diploma Thesis - Image Super-Resolution with Deep Neural Networks
• Developed and optimized Python/PyTorch scripts for image super-resolution and image processing.
• Trained, tested, and debugged deep learning models in a Linux (Ubuntu) environment.

WORK EXPERIENCE

Web Developer Intern | Wapp 06/2026 – 07/2026
Ioannina, Greece
• Developed and maintained responsive web applications using **HTML**, **CSS**, **JavaScript**, **PHP**, and **MySQL**.
• Implemented database-driven functionality by integrating PHP with MySQL to support full CRUD operations.
• Built dynamic user interfaces that retrieved and displayed data from the database in real time.
• Developed role-based functionality, enabling administrators to manage application content while users viewed live updates.

Waiter | Omilos Ioannina, *Seasonal* 05/2021 – 09/2023
Ioannina, Greece
• Delivered high-quality customer service in fast-paced environments.
• Strengthened communication, teamwork, and problem-solving skills while working under pressure.

Outdoor Activities Assistant | Active Nature, *Seasonal* 07/2019 – 09/2021
Ioannina, Greece
• Assisted in organizing and coordinating outdoor group activities.
• Worked effectively within a team while ensuring a safe and positive experience for participants.

LANGUAGES

Greek (Native) | English (B2 – Independent User)

ADDITIONAL INFORMATION

Military obligations completed.
