Philippos Tsikouras *Java / Full-Stack Developer*

philipos793@gmail.com | 6942424628 | Ioannina, Greece | github.com/Philippos793 | linkedin.com/in/philippos-tsikouras

PROFILE

Software Developer with hands-on experience building full-stack web applications using Java, Spring Boot, React, SQL databases, and REST APIs. Experienced in backend development, database integration, authentication, role-based access control, and responsive frontend development. Comfortable working with Hibernate/JPA, Spring Security, Git, Maven, and Docker, with a strong focus on developing reliable and maintainable web applications.

EDUCATION

BSc in Computer Engineering and Informatics 10/2017 – 09/2026
University of Ioannina, Greece

TECHNICAL SKILLS

Programming Languages:
Java, JavaScript, Python, C, PHP

Frameworks & Web Technologies:
Spring Boot, React, HTML5, CSS3

Databases:
SQL, MySQL, PostgreSQL

Tools & Technologies:
Git, GitHub, Maven, Hibernate/JPA, Spring Security, REST APIs, Docker, Linux

LANGUAGES

Greek (Native) | English (B2 – Independent User)

PROJECTS

ManageFlow – Employee Management & Task Collaboration Platform
• Developed the backend of a full-stack application using **Java and Spring Boot**, with PostgreSQL and Hibernate/JPA for data persistence.
• Designed and implemented REST APIs for employee, task, and work-tracking functionality.
• Implemented secure authentication and role-based access control using Spring Security.
• Integrated the Java backend with a React frontend to deliver complete application functionality.
• Containerized the application using Docker to simplify setup and provide a consistent, reproducible development environment.

Online Bookstore Web Application
• Developed a full-stack bookstore application using Java, Spring Boot, MySQL, and HTML.
• Implemented MVC architecture and CRUD functionality for books, users, and orders.

Diploma Thesis - Image Super-Resolution with Deep Neural Networks
• Developed and optimized Python/PyTorch scripts for image super-resolution and image processing.
• Trained, tested, and debugged deep learning models in a Linux (Ubuntu) environment.

WORK EXPERIENCE

Web Developer Intern | Wapp 06/2026 – 07/2026
Ioannina, Greece
• Developed and maintained responsive web applications using HTML, CSS, JavaScript, PHP, and MySQL.
• Implemented database-driven functionality by integrating PHP with MySQL to support full CRUD operations.
• Built dynamic user interfaces that retrieved and displayed data from the database in real time.
• Developed role-based functionality, enabling administrators to manage application content while users viewed live updates.

Waiter | Omilos Ioannina, *Seasonal* 05/2021 – 09/2023
Ioannina, Greece
• Delivered high-quality customer service in fast-paced environments.
• Strengthened communication, teamwork, and problem-solving skills while working under pressure.

Outdoor Activities Assistant | Active Nature, *Seasonal* 07/2019 – 09/2021
Ioannina, Greece
• Assisted in organizing and coordinating outdoor group activities.
• Worked effectively within a team while ensuring a safe and positive experience for participants.

ADDITIONAL INFORMATION

Military obligations completed.
